HOUSED STRAINS

Outbred	Inbred
CD1-E	129/SV-E
	B6 ALBINO
	C57BL/6-E
	SJL-E

Animals are bred and raised on IVC racks. All agents listed are excluded from the colony. A confirmed positive finding would result in immediate recycling of the affected population. Minimal screening frequencies are indicated by the letter code. Where two methods are listed the frequency of the first is indicated by the letter code and the second is performed annually in lieu of the first.

- a = monthly screening
- b = quarterly screening
- c = annual screening
- d = Results do not include incidental or strain related findings; significant findings would result in immediate recycle of the affected population
- e= screened by necropsy examination
